# Prostate Examination Simulator

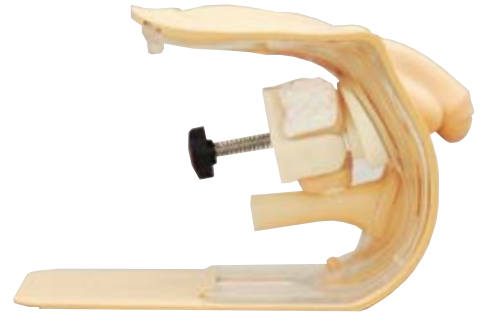

The Prostate & Rectal Simulator includes 9 types of prostates and 4 types of rectums that are easily changeable and can be positioned in 3 different ways.

## TECHNOLOGY

Digital-examination of the prostate and rectums  
Insertion and the use of the anal-scope and the proctoscope

## FEATURES

- Latex free
- Nine types of prostates
- Three revolving units: each unit contains 3 types of prostates
- Training with multiple Prostate Simulators is concurrent and time efficient

Point

## 01 Three Prostate Units

- normal, carcinoma 1 and carcinoma 2
- carcinoma 3, carcinoma 4 and carcinoma 5
- prostatitis, enlargement 1 and enlargement 2

The hardness of each prostate is different.

When in use the prostate is hidden and cannot be seen by the trainee.

**3** revolving units and **9** prostates can easily be changed.

Point

## 02 Four Rectum Units

- Normal
- Pathology featuring large carcinoma
- Small carcinoma
- Polyp combined with small carcinoma
