

# Arterial Puncture Training Wrist

Japanese Patent No. 4073927

Product No. **M99**

Radial artery puncture is a common approach for blood collection and artery catheterization; however, it is a challenging skill for trainees. This innovative simulator is designed to provide training in artery puncture with true-to-life feeling.

#### Production supervision:

Dr. Hiroshi Koyama,  
Medical Director, General Internal Medicine  
National Hospital Organization Kyoto Medical Center

Arterial pulsation is palpable.  
Realistic resistance of tissue and artery wall felt with the injection needle.  
Natural flashback of artificial blood into the needle can be observed.  
Puncture skin, pad and artery tube are replaceable.  
No puncture trace remains on the injection site.  
One-touch, leak free connections.  
Easy clean up.

#### Set includes:

- 1 wrist and hand model
- 1 circulation pump
- 2 sets of puncture skin (inner and outer skin)
- 4 artery tubes
- 1 silicon tape
- 1 jar of coloring powder (red)
- 1 air bulb
- 1 spoon
